Continuing Education Credits

Sessions at this conference will earn continuing education units with the BCCA. The BCCA requires that certificate holders acquire their own verification documentation (conference or workshop agenda and one of the following: contact hours, certificate of attendance, or letter from sponsor of course confirming dates and hours of attendance). CEU hours are calculated by the certificate holder, not the IAA or the BCCA. When calculating the number of CEUs for an activity, base these figures on instructional time, excluding welcomes, introductions, breaks, meals and other non-educational events. The IAA will have certificates of attendance at the registration desk at the conclusion of the event.
